The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

"California is adding battery storage at a pace never seen before as we continue our work to build the grid of the future. The key to a cleaner, more reliable power grid is batteries, and no other ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

The installation would be the Canadian company's first grid-scale deployment of its "advanced compressed-air energy storage" technology.

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions ...

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets ...

According to the American Clean Power Association's (ACP) and Wood Mackenzie's latest U.S. Energy
