Explore ASEAN's energy transition policies. Track renewable electricity, grid development, and EV targets for each country via SIPET's Policy Tracker.

To reveal the enabling policies of battery energy storage application for higher renewable energy systems in ASEAN, this policy brief identifies the challenges and opportunities in each AMS by ...

The necessary regulatory landscape to encourage the uptake of energy storage is not yet in place, with one key issue being the lack of a commercially viable revenue stack.

This paper explores the role of BESS in the ASEAN energy landscape, examining current trends, benefits, challenges, and the pathway towards optimising its potential across the region.

This necessitates policy and power system planning shift that are laser-focused on managing distributed energy resources to better accommodate rooftop solar PV, energy storage, and ...

While ASEAN member states are implementing energy storage technologies, policy gaps are slowing wider adoption and hindering the full renewable energy utilisation. ...

Achieving this vision requires policymakers in each member state to take proactive steps, set clear national targets, and prioritise grid development alongside the continued ...

Regional blueprint for the energy cooperation in the ASEAN that builds on the success of APAEC Phase I: 2016-2020, sets out ambitious targets and initiatives to enhance ...

The development of energy storage systems plays an important role in supporting the integration of variable renewable energy generations. Smart grid developments will impact the ...

Under the Regional Energy Policy and Planning, ASEAN will expand partnerships with Dialogue Partners (DPs) and International Organisations (IOs), and advance energy policy and planning ...

Achieving this vision requires policymakers in each member state to take proactive steps, set clear national targets, and prioritise grid ...
