By combining an 8-bit RISC CPU with In-System Self-Programmable Flash on a monolithic chip, the Atmel ATmega48/V/ 88/V /168/V is a powerful microcontroller that provides a highly flexible ...

Unless specifically provided otherwise, Atmel products are not suitable for, and shall not be used in, automotive applications. Atmel products are not intended, authorized, or warranted for use ...

The company was a leading provider of microcontrollers, touch solutions, and other semiconductor products for various applications in the consumer, industrial, and automotive ...

View online or download Atmel ATmega48/V Preliminary.

Description This application note aims at getting started with the Atmel's ATmega48PB/ 88PB/168PB AVR-based microcontroller.

In this section, we delve into the practical applications of utilizing General Purpose Input/Output (GPIO) pins and various peripherals to enhance the functionality of embedded systems.
