industry. In 2022 less than 2% of Armenia's electricity was generated by solar power.

OverviewPotentialPhotovoltaicsThermal solarSee alsoExternal linksSolar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was generated by solar power. The use of solar energy in Armenia is gradually increasing. In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor.

Despite the progress, challenges remain in Armenia. The integration of variable renewable energy sources like solar requires upgrades to the existing grid infrastructure. ...

The objective of the present report is to assess Armenia's legal and regulatory framework for energy storage and provide recommendations for reforms that would be needed to ...
