Led by Professor Weixiang Shen, one of the projects will focus on extending the lifespan of battery energy storage systems used in power grids, as revealed in a news release.

Discover five energy storage projects revolutionizing Australia's energy landscape. Learn about innovative technologies, ...

The 200 MW/400 MWh BESS being installed by Philippines-owned energy company Acen next to its New England solar project, in northern NSW, is due for commercial ...

Logistics company announces completion of Australia's first off-grid and totally renewable electric truck hub, charging a fleet of 30 electric trucks with onsite solar and battery storage.

This pivotal project is set to enhance Australia's infrastructure by providing essential grid stability and supporting the integration of renewable energy, aligning with the ...

Big battery projects currently being rolled out in Australia are more than ten times bigger than the first installed eight years ago at Hornsdale. Here are the 10 biggest.

Equis Australia is developing additional battery projects across Australia, including the 250MW/500MWh Calala battery energy storage system (BESS) in New South Wales, ...

Discover five energy storage projects revolutionizing Australia's energy landscape. Learn about innovative technologies, impressive capacity.

The 200 MW/400 MWh BESS being installed by Philippines-owned energy company Acen next to its New

England solar project, in ...

Big battery projects currently being rolled out in Australia are more than ten times bigger than the first installed eight years ago at ...

Logistics company announces completion of Australia's first off-grid and totally renewable electric truck hub, charging a fleet of 30 electric trucks ...

From the 2.4 GW Denman BESS to the 850 MW Bremer and Waratah Super Batteries, these seven BESS projects Australia alone will deliver tens of ...

The Australian Capacity Investment Scheme (CIS) is set to bolster energy storage capabilities in Victoria and South Australia with support for six new large-scale battery projects.

With an investment of over \$700 million, the WESS will be one of the largest energy storage systems in Australia, capable of providing vital grid stability for local ...

With an investment of over \$700 million, the WESS will be one of the largest energy storage systems in Australia, capable of ...

From the 2.4 GW Denman BESS to the 850 MW Bremer and Waratah Super Batteries, these seven BESS projects Australia alone will deliver tens of gigawatt-hours of storage across New ...
