The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total of A\$2.4bn (\$1.5bn) reaching the ...

The Australian Energy Market Operator (AEMO) has forecast that Australia will need 19 GW of energy storage capacity in the grid by 2030. This will more than double to 43 GW by 2040, ...

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially operational in the NEM, ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, ...

As Australia advances its clean energy ambitions, battery storage stands as both a technological necessity and ...

Energy storage systems, such as big batteries, are a critical part of Australia's future energy mix and act as a reliable back-up system ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the ...

As Australia advances its clean energy ambitions, battery storage stands as both a technological necessity and a financial opportunity, delivering reliability, sustainability, and ...

Uptake of utility-scale batteries in Australia could expand eightfold to 18GW in 2035 from 2.3 gigawatts in 2024, according to a new report published by research provider ...

Uptake of utility-scale batteries in Australia could expand eightfold to 18GW in 2035 from 2.3 gigawatts in 2024, according to a new ...

Australian homes have installed more than 100,000 home batteries with a combined storage size of more than 500MW/1,099 MWh. This is ...

Energy storage systems, such as big batteries, are a critical part of Australia's future energy mix and act as a reliable back-up system allowing us to store renewable energy ...

The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total ...

Australian homes have installed more than 100,000 home batteries with a combined storage size of more than 500MW/1,099 MWh. This is equivalent to almost double the size of Australia's ...

Business intelligence company Rystad Energy has said that almost 4 GW of utility-scale battery energy storage systems (BESS) ...

Business intelligence company Rystad Energy has said that almost 4 GW of utility-scale battery energy storage systems (BESS) entered construction in the first nine months of ...
