Will a curtain wall help Boston meet its carbon-free mandate?

Image courtesy of Millennium Partners Boston. Curtain wall construction has begun on what will become the world's largest passive house office building, marking an important milestone in the drive to give Boston an iconic and environmentally friendly new skyscraper that could help the city meet its carbon-free mandate by midcentury.

Which building has a glass curtain wall?

Designed by the architect Peter Ellis and built in 1864, it is the world's first building to feature a metal-framed glass curtain wall. 16 Cook Street, Liverpool, 1866. Extensive use is made of floor-to-ceiling glass, enabling light to penetrate deeper into the building, thus maximizing floor space. Glass curtain wall of Bauhaus Dessau, 1926

What are curtain walling systems?

Curtain walling systems are significant in modern architecture, providing structural strength, energy efficiency, and aesthetic flexibility. These include commercial building aluminum curtain walls, glass curtain walls for the highest-rise office towers, and many others that enhance both form and function.

What is a plastic curtain wall system?

Plastic Curtain Wall Systems - Used for temporary structures and industrial applications. Curtain walling systems are widely used in commercial curtain wall projects such as corporate office buildings, shopping malls, and airports, where a combination of design flexibility and energy efficiency are necessary. 1.
