Are cell phones a problem in Burundi?

All fixed connections via DSL, cable or satellite were counted here, but not those connected to the internet via mobile communications. The increasing prevalence of cell phones and the simultaneous decline in landline phones clearly indicate a change in Burundi.

Is Burundi lagging behind in the development of telecommunications?

Compared to the United States, Burundi is massively lagging behind in the development of telecommunications. Under the country code +257, there were a total of 7.49 million connections in 2022. Among them were 7.47 million mobile phones, which corresponds to an average of 0.58 per person. In the US, this figure is 1.1 mobile phones per person.

Does Burundi have a good internet connection?

Burundi is lagging behind in the expansion of broadband internet connections. Around 6 percent of all residents have access to the internet. Around 0 percent have their own fast internet connection, which is at least faster than the former ISDN (more than 256 kbit/s).

To prepare Burundi for the imminent introduction of the fifth generation of mobile communications technology (5G), the ARCT has just ...

Coverage and Uptake: As of late 2024, Starlink covers all of Burundi's territory via its satellites - effectively, anyone in Burundi can order a kit and get connected, whether they ...

There are four main mobile operators in Burundi: Econet Leo, Onatel, Lumitel, and Smart Burundi. Each of these operators offers a range of services including voice, messaging, and mobile data.

Coverage and Uptake: As of late 2024, Starlink covers all of Burundi's territory via its satellites - effectively, anyone in Burundi can ...

Burundi's Telecommunications Regulation and Control Agency (ARCT) has earmarked July 2024 as a target for the launch of commercial 5G in the market.
