---

At Intersolar 2014, Solarworld let a cyclist jump onto glass-glass modules to demonstrate their resistance to breakage. Electroluminescence images taken afterwards confirmed that the cells ...

The latest report by the National Renewable Energy Laboratory (NREL) has shown concerns over glass breakage in ...

The drastic increase in glass cracks is requiring even more time and attention from too few technicians. While cracks that are barely ...

The latest report by the National Renewable Energy Laboratory (NREL) has shown concerns over glass breakage in photovoltaic (PV) modules as the industry shifts ...

Discover the top 5 causes of glass breakage in solar modules and how to prevent them for improved durability and efficiency in your solar panel system.

PV Tech spoke with Joerg Althaus of CEA about the under-explored issues with solar racking, trackers and other technical concerns.

PV module glass breakage has long been an observed failure mode in fielded solar projects. In recent years, however, the nature and ...

PV module glass breakage has long been an observed failure mode in fielded solar projects. In recent years, however, the nature and causes of solar glass fracture have ...

Several interrelated factors increase the risk of glass failure in modern solar panels. These range from technological advancements to ...

Solar modules are getting bigger, thinner, and more powerful. But from Texas to Thailand, the same problem is appearing: broken glass. Not from hail or mishandling, but from ...

At Intersolar 2014, Solarworld let a cyclist jump onto glass-glass modules to demonstrate their resistance to breakage. Electroluminescence images ...

Solar glass is designed to be tough. But under the wrong conditions, even tempered glass can crack, shatter, or fail--posing major ...

Solar glass is designed to be tough. But under the wrong conditions, even tempered glass can crack, shatter, or fail--posing major risks to performance, safety, and ...

Solar modules are getting bigger, thinner, and more powerful. But from Texas to Thailand, the same problem is appearing: broken ...

Several interrelated factors increase the risk of glass failure in modern solar panels. These range from technological advancements to designing issues which become ...

Solar modules are getting bigger, thinner, and more powerful. But from Texas to Thailand, the same problem is appearing: broken glass. These breakages are not caused by ...
