---

Partnering with Chilean solar developer Traveses Solar, Canadian Solar will supply an impressive 912 MWh energy storage ...

The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's ...

The first two phases of Latin America's "biggest" solar-plus-storage project, Oasis de Atacama, have been commissioned in Antofagasta, Chile.

Zelestra will develop a 220 MWp of solar Photovoltaic and 1 GWh of energy storage capacity in Chile. Solar and storage projects are ...

Priority funding is directed toward integrated solar-plus-storage demonstration projects in the Atacama Desert, aiming to accelerate the energy transition in northern Chile. The Atacama ...

The first two phases of Latin America's "biggest" solar-plus-storage project, Oasis de Atacama, have been commissioned in ...

The first two phases of Oasis de Atacama, the largest solar power and energy storage project in Latin America, have come on stream ...

Grid constraints have prevented Chile from maximising the potential of its world-class solar resources. Energy storage has, therefore, ...

The first two phases of Oasis de Atacama, the largest solar power and energy storage project in Latin America, have come on stream in Chile's Antofagasta Region.

Storage project announcements are coming thick and fast as co-location with wind turbines offers cost efficiency and a smoother generation profile. Meanwhile, new capacity ...

The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses. "We're living through a true energy storage ...

Zelestra will develop a 220 MWp of solar Photovoltaic and 1 GWh of energy storage capacity in Chile. Solar and storage projects are crucial in Chile's decarbonization ...

Partnering with Chilean solar developer Travesa Solar, Canadian Solar will supply an impressive 912 MWh energy storage system to be seamlessly integrated with the 600 MWp ...

Grid constraints have prevented Chile from maximising the potential of its world-class solar resources. Energy storage has, therefore, become a necessity to ensure the ...

Brazil's net metering program (compensation at 90% of energy price) favors small-scale container PV for telecom sites, while Chile's non-subsidized merchant solar market prioritizes large ...

Chile had 3 GW of energy storage projects operational, undergoing testing, or under construction by November 2024, according to the latest renewable energy figures published by ...
