A startup specializing in high-performance batteries is close to starting operations at a facility near Chicago's central business district that will help power devices such as night ...

Chinese EV battery maker Gotion has chosen Illinois for the company's planned development of a new \$2 billion EV lithium battery plant. The facility is the latest Chinese ...

Illinois is lagging on battery storage--projects that collect solar and wind energy to use when the sun isn't shining and the wind isn't blowing. But major energy legislation that the ...

This article assesses both the solar panel and electric vehicle battery sectors, and considers the challenges and opportunities that Chinese competition creates for the US.

This mindmap outlines the core components of the proposed solar and battery storage project, illustrating how various inputs, system requirements, and financial aspects ...

A revamp of China's electricity market is boosting the economics of storing power just as international demand surges.

Chinese EV battery maker Gotion has picked Illinois as the ...

Chinese EV battery maker Gotion has picked Illinois as the site of a new \$2 billion EV lithium battery plant in the United States, the Midwestern state's governor JB Pritzker ...

Chinese EV battery maker Gotion has chosen Illinois for the company's planned development of a new \$2 billion EV lithium battery ...

Chinese scientists have built a solar battery that captures sunlight and stores electricity at the same time with 4.2 percent efficiency.

VPPs tap into everyday home technologies, including solar panels and batteries, by transmitting excess stored energy to the grid.

An influx of power-hungry data centers and the steady flow of industry back to Illinois are colliding with delays in getting renewable energy projects on the grid.

This article assesses both the solar panel and electric vehicle battery sectors, and considers the challenges and opportunities that ...

An influx of power-hungry data centers and the steady flow of industry back to Illinois are colliding with delays in getting renewable ...
