---

Performance of three different methodologies and equipment (broadband probes, spectrum analyzers, and drive test scanners), in the context of human exposure to ...

Mobile communications technology has developed through several generations (G) and there have been many 2G, 3G and 4G base stations installed throughout the environment, ...

In this case report we present a woman aged 52 years who developed health problems consistent with the microwave syndrome after installation of a 5G base station facing ...

Despite extensive studies into the health effects of mobile phones and base stations over the last two or three decades, there is no indication of an ...

High-frequency systems like 5G require direct Line-of-Sight (LOS) between stations. Without LOS, signal quality degrades, resulting ...

Base stations are the core of mobile communication, and with the rise of 5G, thermal and energy challenges are increasing. This article ...

This paper selects several typical scenes (Open spaces, building concentration areas, user and building intensive areas) for electromagnetic radiation monitoring, and ...

Most importantly, based on this exhaustive literature review, there are yet any published evaluations studying the effects of exposure from 5G base stations on the cognitive ...

Base stations are the core of mobile communication, and with the rise of 5G, thermal and energy challenges are increasing. This article explains the definition, structure, ...

In this case report we present a woman aged 52 years who developed health problems consistent with the microwave syndrome after ...

This review analyzes the latest research on electromagnetic exposure on humans, with particular attention to its effect on cognitive performance, well-being, physiological ...

In this paper, a framework is developed to study the impact of different power model assumptions on energy saving in a 5G separation architecture comprising high power ...

High-frequency systems like 5G require direct Line-of-Sight (LOS) between stations. Without LOS, signal quality degrades, resulting in delays and data loss. Therefore: ...

Despite extensive studies into the health effects of mobile phones and base stations over the last two or three decades, there is no indication of an increased health risk when exposed to ...
