Who is Bergen Engines?

Bergen Engines is a European company with a global presence, that builds medium-speed liquid and gas-fueled reciprocating engines, and generator sets for a broad range of land-based and marine applications.

What is a Bergen generator?

Bergen engines provide reliable, responsive and high-performance power solutions for any operational mode. Bergen generator sets offer a wide range of power solutions from baseload, variable load, peaking, grid support and emergency power, to combined heat and power (CHP) and hybrid solutions with renewable energy sources.

Where can I find a Bergen engine?

Bergen engines can also be found in direct propulsion applications. On land, Bergen engines are principally found driving alternators in power generation applications, either singularly or in multiples up to 200MW. Find out more about our extensive spare parts inventory.

What are Bergen Engines used for?

At sea, Bergen engines power generators for offshore oil & gas installations and on board a wide range of ocean-going vessels. Bergen engines can also be found in direct propulsion applications. On land, Bergen engines are principally found driving alternators in power generation applications, either singularly or in multiples up to 200MW.

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized ...
