Why is wind power not being developed in the Czech Republic?

The development of wind power is being prevented primarily for economic and political reasons even though the potential for producing cheap, clean power from wind in the Czech Republic is enormous. We can look to Austria and Poland for examples.

Are there wind turbines in the Czech Republic?

Just a few meters over the Czech side of the border there are no wind turbines to be found -- as if in the Czech Republic the wind doesn't blow at all.

How many PV plants are there in the Czech Republic?

During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp. The development of wind energy in the Czech Republic also continues apace. The Czech government plans to triple the installed capacity from wind power by 2030, from the current 350 MW to 1 MW.

What is the Czech energy fund?

There are several programmes designed under this scheme in the Czech Republic to support areas such as the modernisation of heating sector, transport modernisation, energy efficiency as well as the development of new renewable energy sources projects, for which about 40% of the whole Czech part of the fund is anticipated to be assigned to.
