Does Denmark have 5G?

As a result, Denmark has a 98% 5G coverage for households, the highest in the EU and well above the EU average of 66%. All major mobile operators in Denmark offer 5G subscriptions for both retail and commercial customers. The country is ranked 2nd in the EU for the integration of digital technology in businesses.

Why is TDC net the first 5G provider in Denmark?

That's why TDC NET is the first Danish provider to offer nationwide 5G with a coverage of 99,7%. Because we want to invest in Denmark's digital future. TDC NET is the first with 5G in Denmark. And with nationwide 5G, Denmark is consolidating a digital leadership position in the world. For Danes and the Danish business community.

What is Denmark's best mobile network?

Denmark's best mobile network - with nationwide 5G. A bit ahead of the future. TDC NET has been measured to have Denmark's fastest and most error-free mobile network for ten consecutive years. We were first with nationwide 5G have upgraded and accelerating the digital development. Because we think Denmark need to be a bit ahead. Of the future.

What is 4G & 5G?

The high data transfer rates make 4G networks suitable for use in USB wireless modems for laptops and even home internet access. 5G is the fifth generation of mobile phone communications standards. It is a successor to 4G and promises to be faster than previous generations while opening up new uses cases for mobile data.

This network offers a coverage rate of 99.3%. If you don't have access to 5G, you'll still have access to connectivity features via TDC's 2G, 3G, and 4G infrastructure.

In fact, the Danish Technological Institute recently measured our 5G coverage at a whopping 99,7%. To
