What radio stations are in Bangui?

In Bangui, UN-sponsored Radio Ndeke Luka ("bird of luck") provides balanced output, and rebroadcasts international news programming. Other radio and TV stations are run by the state-run Radiodiffusion-Television Centrafricaine and provide little coverage of the political opposition.

What is a wireless base station?

A base station represents an access point for a wireless device to communicate within its coverage area. It usually connects the device to other networks or devices through a dedicated high bandwidth wire of fiber optic connection. Base stations typically have a transceiver, capable of sending and receiving wireless signals;

What are the different types of base stations?

Some basic types of base stations are as follows: Macro-base stations are tall towers ranging from 50 to 200 feet in height, placed at strategic locations to provide maximum coverage in a given area. Those are equipped with large towers and antennas that transmit and receive radio signals from wireless devices.

What are the properties of a base station?

Here are some essential properties: Capacity: Capacity of a base station is its capability to handle a given number of simultaneous connections or users. Coverage Area: The coverage area of a base station is that geographical area within which mobile devices can maintain a stable connection with the base station.

In Bangui, UN-sponsored Radio Ndeke Luka ("bird of luck") provides balanced output, and rebroadcasts international news programming. Other radio and TV stations are run by the ...

o Radio stations: the State-owned radio network, Radio Centrafrique, is supplemented by a small number of privately owned broadcast stations as well as a few community radio stations; transmissions of at least 2 international broadcasters are available (2007). o The BBC World Service (90.2 FM), Radio France
