-----  
How many solar panels are installed in Jordan?

According to annual reports by Jordan's grid operators, the total installed on-grid solar PV capacity reached 2,073.86 MW by the end of 2024. This capacity is divided as follows: Distribution System Operators (DSOs): 1,081.86 MW across 74,145 projects. Transmission System Operator (TSO): 992 MW. The largest DSO-managed installations were by:

Is there a cap on solar PV projects in Jordan?

In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations. A notable example is a 50 MW solar power plant financed by Cairo Amman Bank and currently under construction.

How much does solar cost in Jordan?

The commercial sector faces higher grid fees of 13 JD (\$18.3 USD) per kWac/month, reducing the economic viability of installations. In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations.

Why does Jordan need a solar PV installation & maintenance service?

Since Jordan started the solar PV installation in 2012, the demand for solar PV operation and maintenance (O&M) services increased, driven by aging systems requiring inverter replacements (every 8-10 years) and system optimization.

Jordan has long-term potential for additional RE investments, enjoying an average of 316 sunny days per year, wind speeds ranging between 7 and 8.5 m/s, and large desert ...

In partnership with E-Dimension, a member of The Jordan Telecom Group, Orange Jordan has engaged with Kawar Energy to construct the infrastructure for three solar farms, located in the ...

There are 68 Solar photovoltaic power plants in Jordan as of July, 2025. Download the latest data on Solar photovoltaic power plants in Jordan.

Jordan continues to lead the MENA region in solar PV adoption, with an installed capacity exceeding xx MW in 2023. By 2030, the country targets ...

These solar farms are located in Amman, al-Khalidiya, and in the Mafraq development area. They deliver electricity to the grid through the so ...

In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations. A notable example is a 50 MW solar power plant ...

Data and information about Solar power plants and their location plotted on an interactive map of Jordan.

With grid capacity a limiting factor, the Middle Eastern country has moved to foster private-to-private solar projects to meet industrial ...

Effective September 2024, prosumers in Jordan can now choose from four on-grid solar PV connection mechanisms: The bylaw ...

These solar farms are located in Amman, al-Khalidiya, and in the Mafraq development area. They deliver electricity to the grid through the so-called wheeling process. The solar farms were built ...

In partnership with E-Dimension, a member of The Jordan Telecom Group, Orange Jordan has engaged with Kawar Energy to construct the ...

Effective September 2024, prosumers in Jordan can now choose from four on-grid solar PV connection mechanisms: The bylaw imposes a "Grid Fee" on all mechanisms except ...

In total, Orange has installed solar panels at 5,400 of its telecom sites (some 100 % solar, others hybrid) saving 55 million litres of fuel each year. Furthermore, in Jordan, ...

Jordan continues to lead the MENA region in solar PV adoption, with an installed capacity exceeding xx MW in 2023. By 2030, the country targets 50% renewable energy in its electricity ...

With grid capacity a limiting factor, the Middle Eastern country has moved to foster private-to-private solar projects to meet industrial power demand. Jordanian telecom operator ...
