---

Glass for Europe represents almost 90% of flat glass production in the EU and its members can play a central role in rebuilding a European solar industry in the EU.

In a new study, researchers at the Fraunhofer Institute for Solar Energy Systems ISE have calculated that silicon photovoltaic modules manufactured in the European Union produce 40 ...

Glass for Europe represents almost 90% of flat glass production in the EU and its members can play a central role in rebuilding ...

EU ProSun Glass members are committed to the highest environmental and labour standards. We are promoting the further development of PV-modules and solar collectors by introducing ...

Measuring 101.6 cm by 152.4 cm, this innovative glass window can generate solar power while maintaining a clear view, marking a significant milestone in the quest for ...

In this blog, we will delve into the world of solar glass panels and explore how they are illuminating the future of power generation.

Discover what photovoltaic glass is, how it works, and how to integrate solar energy and automation into homes and businesses efficiently and sustainably.

ENERGYGLASS(TM) is a patented Optically Clear Vertical Building Photovoltaic Window System that produces continuous Energy from Sunlight, Diffused, Ambient Light and Ground ...

AGC's solar glass range includes high reflectivity solar mirrors as well as high transmission solar glass substrates (Sunmax) to be used for solar concentrators and solar receivers.

Glass products are indispensable to the transition towards a climate-neutral circular economy and therefore it asks EU policymakers to put the glass sector and all its subsectors at the heart of ...

This is the first time that a manufacturer will introduce glass from solar panels into its flat glass production, a material with very demanding applications, since it is mainly intended for the ...
