-----

In T rkiye, cooling-related electricity consumption increased by 26% in just the last three years, reaching 10 TWh in 2024. Its growing impact on the grid can be reduced through widespread ...

In this article, we will explore how T rkiye's advancements in solar energy can help combat growing air conditioning demands and ...

A research group from the Burdur Mehmet Akif Ersoy University in Turkey has investigated how solar power may help reduce carbon emissions and improve the ...

Solar HVAC, harnessing the sun's abundant power, offers a paradigm shift. It minimizes grid reliance, slashes electricity bills, and provides year-round comfort--a significant ...

This study will also examine the current challenges involved with using solar energy in cooling applications, as well as the possible benefits that may help pave the way for ...

T rkiye is suffering from increasing summer heat waves, especially in the western part of the country, creating dramatic increases ...

T rkiye is suffering from increasing summer heat waves, especially in the western part of the country, creating dramatic increases in electricity use from ACs. But the country has ...

This study will also examine the current challenges involved with using solar energy in cooling applications, as well as the possible ...

This chapter has conducted the design and performance analysis of an assisted solar heating, ventilation, and

air conditioning (HVAC) system using thermoelectric devices ...

Besides delivering the most power when cooling demand is at its highest, solar also provides cost stability for consumers and reduces ...

In this article, we will explore how Türkiye's advancements in solar energy can help combat growing air conditioning demands and contribute to a greener future.

Besides delivering the most power when cooling demand is at its highest, solar also provides cost stability for consumers and reduces Türkiye's dependence on energy imports, ...

A research group from the Burdur Mehmet Akif Ersoy University in Turkey has investigated how solar power may help reduce ...

In this study, the effect of air conditioners (ACs) on reducing energy consumption in the case of supporting AC systems used in residential air conditioning with solar energy from ...

Most studies on green transition in Türkiye focused on the impact of adopting an environmental tax or the impact of coal subsidies. Studies focusing on employment effects overlooked the ...
