What is a battery energy storage system (BESS) warranty?

As challenging as warranties are for battery energy storage system (BESS) owners and operators, it is possible for there to be more clarity. Look no further than how the automotive industry handles electric vehicle warranties. They are simple and flexible, typically covering time (usually eight years) and mileage (usually 100,000 miles).

Does the warranty model for energy storage systems keep pace?

Inflexible and complex, the warranty model for energy storage systems has failed to keep pace with rapid market growth, the authors argue. This is an extract of a feature article that originally appeared in Vol.41 of PV Tech Power, Solar Media's quarterly journal covering the solar and storage industries.

What is included in a subscription to energy-storage & smart power?

Every edition includes 'Storage & Smart Power', a dedicated section contributed by the Energy-Storage.news team, and full access to upcoming issues as well as the nine-year back catalogue are included as part of a subscription to Energy-Storage.news Premium.

Do warranty conditions limit daily charge-discharge cycles?

For instance, most warranty conditions cap daily charge-discharge cycles to one or two, even though significant portions of annual revenue are generated during just a few high-demand days in some markets. As the industry shifts from contracted revenues to higher shares of merchant operation, such limitations become increasingly costly.
