We're deploying more battery storage than any state in America, building a stronger grid, cutting pollution, and making abundant clean energy even more affordable.

Chinese battery manufacturer CALB has embarked on a major expansion at its Chengdu facility, investing CNY 12 billion (US\$1.67 billion) in a second-phase project. Once ...

Projects Bring a Combined 600 MW of Solar and 390 MW of Battery Storage to Power 270,000 Homes and Create an Estimated 950 Construction Jobs For immediate ...

Tesla continues to cement its position as a major force in grid-scale energy storage, with a new \$500 million battery energy storage system (BESS) set to come online in ...

Engie North America asked the California Energy Commission to suspend processing its request to build a lithium battery storage facility in San Juan Capistrano after ...

Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses.

The announcement stated that this project would facilitate a rapid response to the demand for new energy vehicle battery components from key local customers in Hungary, ...

Samsung SDI is ramping up its manufacturing of energy storage batteries in the US to 30GWh by the end of
