-----

To bring more operational flexibility to transmission lines and comply with the electrical sector's digitalization trends, we propose implementing battery energy storage ...

Southern California Public Power Authority (SCPPA) is a Joint Powers Authority, created in 1980, for the purpose of providing joint planning, financing, construction, and ...

The project would connect to the SDG& E electric transmission system via a proposed loop-in transmission line that would be constructed to transfer power to and from the proposed project.

In the United States, California's Pacific Gas and Electric selected a 10 MW energy storage project as part of a portfolio of transmission solutions during its regional transmission planning ...

This paper presents a modeling framework that supports energy storage, with a particular focus on pumped storage hydropower, to be considered in the transmission planning ...

CAISO identified a joint proposal from transmission system owner Pacific Gas & Electric and local community choice aggregator East Bay Community Energy to procure energy storage and ...

This paper reviews regulatory proceedings to define three types of energy storage assets that can interact with the transmission system: storage as a transmission asset, ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

The article underscores the critical strategies for effectively integrating energy storage into transmission
