How do energy storage incentives work?

Energy storage incentives are paid up to 6 MWh of capacity with tiered incentive rates. For energy storage projects that are greater than 2 MWh, incentives decline according to the following schedule.

Who is eligible for energy storage incentives?

You may be eligible if you are in a High Fire-Threat District (HFTD) or have been affected by two or more Public Safety Power Shutoff (PSPS), Enhanced Power Safety Settings (EPSS) and/or wildfire events. Energy storage incentives are reduced as the duration of energy storage (Wh) increases.

Who is eligible for the residential solar and storage equity budget?

You may be eligible if you are in or serve a low-income or disadvantaged community. The Residential Solar and Storage Equity budget provides incentives for installing qualifying standalone energy storage technologies and solar paired with storage for low-income residential customers within the SDG&E service territory.

What is the incentive tax credit for large-scale storage projects?

The incentive for large-scale storage projects claiming the incentive tax credit (ITC) will maintain a 72% differential from the incentive rate for non-ITC large-scale storage projects in all steps for equipment purchased before December 31, 2021. Large-Scale Storage Claiming ITC and equipment purchased before 12/31/2021.

There are two categories of new, higher rebates for SGIP - "Equity" and "Equity Resiliency". Both categories aim to ensure lower-income, medically vulnerable, and at-risk for fire communities ...

The Equity Resiliency budget provides incentives for installing qualifying energy storage technologies for vulnerable residential and non-residential customers with critical resiliency ...
