Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

How many MW of new battery energy storage will Georgia Power Buy?

An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and, in August, Georgia Power also announced the locations of 500 MW of new BESS projects that will be owned by the company.

What is Georgia Power's 530-megawatt battery storage system?

Georgia Power breaks ground at the McGrau Ford Battery Facility in Cherokee County on April 4, 2025. This 530-megawatt battery energy storage system will consist of two phases, approved in the 2022 Integrated Resource Plan (IRP) and 2023 IRP Update. Courtesy: Georgia Power.

Does Georgia Power have a Bess project?

Georgia Power continues to work with the Georgia PSC to procure and develop BESS projects across Georgia. In addition to the Mossy Branch facility, Georgia Power is developing the 265 MW McGrau Ford Phase I BESS project in Cherokee County. This project was approved in the 2022 IRP, and Georgia Power expects it to enter service by the end of 2026.

Georgia Power has begun construction on 765MW of new battery energy storage systems (BESS) across Georgia, US.

In total, 765 megawatts (MW) worth of new BESS will be strategically located across Georgia in Bibb, Lowndes, Floyd, and Cherokee counties.
