Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.

Where is Georgia's largest solar power plant located?

The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia. Other facilities add carbon-free energy to the grid and supply renewable energy in support of our Community Solar program. 1. North Georgia

What is the largest solar farm in Georgia?

The largest solar farm in Georgia is Wadley Solar as of December 2025. The project is located in Jefferson, GA and has a capacity of 260 MW. Cleanview tracks 10,000+ power projects, 1,000+ data centers, and 700+ developers in the U.S. Each month we spend hundreds of hours researching and updating our database.

How many solar farms are there in Georgia?

As of December 2025, there are 152 utility-scale solar farms in Georgia, according to Cleanview's project tracker. Their total operating capacity is 5,414 MW. In 2024, there were 8 solar farms built in Georgia. Click any of the links below to jump to a specific section: To see a list of the top solar developers in the US, check out this page.

Designed to strengthen grid reliability and deliver flexible, dispatchable power, the BESS is part of a broader, multi-phase initiative that also includes a 174 MW photovoltaic (PV) ...

The site in Bibb County is being built next to the solar facility by Robins Air Force Base, allowing Georgia Power to leverage existing ...

We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of ...

Here are the solar projects in Georgia expected to come online in the next 18 months. These projects are currently under development or construction and represent the near-term growth ...

Here is a list of the most recently built solar farms in Georgia. Scroll down to view information on each project like their capacity, construction date, and ...

The site in Bibb County is being built next to the solar facility by Robins Air Force Base, allowing Georgia Power to leverage existing infrastructure while removing the need to ...

Designed to strengthen grid reliability and deliver flexible, dispatchable power, the BESS is part of a broader, multi-phase initiative ...

Here is a list of the most recently built solar farms in Georgia. Scroll down to view information on each project like their capacity, construction date, and location.

In a clearing 30 minutes outside Columbus, Georgia Power is almost finished installing what it says will be the state's largest battery storage facility yet, a 65-megawatt ...

This document provides voluntary guidance on a range of recommended management practices for PV solar facility developers to consider that can help maximize opportunities to develop PV ...

The Georgia PSC has approved five new PPAs under Georgia Power's CARES 2023 program, totaling 1,068 MW of solar capacity, with one project also including battery ...

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill ...
