Thanks to the intelligent combination of state-of-the-art battery technology and smart control functions, the MobilHybrid stores surplus energy and releases it exactly when you need it.

To date, it has seen only bids for solar PV and battery projects, but for the first time in the latest round, wind projects combined with energy storage received bids. However, none ...

If you're involved in a hybrid project or planning one in Germany, I'd love to hear your insights and experiences. Let's collaborate ...

We deliver and service comprehensive, powerful and reliable systems, based on both gas and diesel engines, as well as electrified hybrid systems. These clean and ...

Impact: In addition to financial returns, large battery projects also generate immaterial returns, as these storage systems accelerate the energy transition and contribute to reducing CO2 ...

The new hybrid storage system developed in the HyFlow project combines a high-power vanadium redox flow battery and a green supercapacitor to flexibly balance out the ...

Designed for seamless integration with solar PV, diesel generators, and unstable local grids, the system enhances energy reliability, boosts energy efficiency, and enables full on- and off-grid ...

Thanks to the intelligent combination of state-of-the-art battery technology and smart control functions, the MobilHybrid stores surplus energy and ...

Hybrid projects that combine solar, wind, and energy storage are essential to meet Germany's clean energy
