At a Glance: Key Takeaways: In 2024, global cumulative PV capacity reached over 2.2 TW, with China alone surpassing 1 TW. At least 554 ...

We've gathered over 90 key solar energy statistics to show you exactly what's happening in this fast-growing sector. Our data comes from trusted sources. These include ...

With China implementing major changes to its solar market design this year, a temporary dip in global growth in 2026 appears very likely. Meanwhile, other regions are falling ...

At a Glance: Key Takeaways: In 2024, global cumulative PV capacity reached over 2.2 TW, with China alone surpassing 1 TW. At least 554 GW of new PV systems were commissioned in ...

Executive Summary Global Solar Deployment IEA reported that in 2023, 407-446 GWdc of PV was installed globally, bringing cumulative PV installs to 1.6 TWdc. China continues to ...

The present review study, through a detailed and systematic literature survey, summarizes the world solar energy status along with the published solar energy potential ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

While the Energy Institute (EI) provides a longer time series (dating back to 1965) than Ember (dating back only to 1990 for European countries and 2000 for other countries), EI ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output ...

It covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities ...
