-----

In this article, we provide a summary of the key points of the Ministerial Decision. Classification and capacity caps for eligible BESS projects. The decision classifies eligible ...

The Special BESS Grid Connection Scheme applies to BESS projects set to be connected both to the Transmission System operated by IPTO and to the Distribution Network operated by HEDNO.

This white paper explores two important technologies in this domain: Uninterruptible Power Supply (UPS) systems and Battery Energy ...

In Greece, the story starts at a different stage. While the balancing markets (like aFRR & mFRR) will be a very interesting source of revenues, a big part of BESS will also ...

Eligible BESS units provide fast response, sustained delivery, and continuous telemetry. Payments combine tender-based capacity remuneration and pay-as-bid activation.

With 4.7 GW of merchant BESS capacity now eligible under this regime, Greece is making a decisive move toward a more flexible, resilient and efficient energy system, with a ...

A: In view of the state of the Greek energy landscape (grid congestion, high penetration of PVs), during the past few years, the Greek State has been implementing ...

This comprehensive guide breaks down the key differences between uninterruptible power supplies (UPS) and battery energy storage systems (BESS). We explain their functions, ...

With 4.7 GW of merchant BESS capacity now eligible under this regime, Greece is making a decisive move

toward a more flexible, ...

Greece recently announced a plan to fast-track standalone storage projects, pushing toward its 2030 goal of 4.3GW of battery storage. At EuroEnergy, we recognize BESS ...

Amendments in the core energy regulatory framework now allows the development and operation of BESS connected to the grid. Many projects have now made significant licensing progress ...
