A draft of the new policy outline, likely to be finalized in coming weeks, scraps plans to build offshore wind turbines, instead ...

A draft of the new policy outline, likely to be finalized in coming weeks, scraps plans to build offshore wind turbines, instead building more onshore wind capacity, rooftop ...

Grid infrastructure remains a critical bottleneck --the national power transmission system, designed for centralized coal and hydropower, struggles to integrate intermittent solar ...

With global costs for solar, wind, and battery storage systems continuing to fall, Vietnam could replace fixed FiTs with transparent auctions, enabling clean energy ...

Vietnam targets clean energy leadership with ambitious wind and solar goals. Discover the updated renewable energy plans now.

Some estimates show that the wind and solar sector will create over 300,000 new jobs in Vietnam by the 2030s. Environmentally, solar power ...

With global costs for solar, wind, and battery storage systems continuing to fall, Vietnam could replace fixed FiTs with transparent ...

Some estimates show that the wind and solar sector will create over 300,000 new jobs in Vietnam by the 2030s. Environmentally, solar power significantly reduces Vietnam's carbon emissions, ...

Grid infrastructure remains a critical bottleneck --the national power transmission system, designed for centralized coal and ...

The findings reveal that despite Vietnam"s vast natural potential--such as hydropower, wind, solar, biomass, and geothermal energy--several barriers hinder progress, including regulatory ...

As Southeast Asia accelerates its transition to renewable energy, Hanoi has emerged as a testing ground for cutting-edge energy storage solutions. The Hanoi Energy Storage Joint Control ...

Educating and re-skilling the existing workforce in new technologies, such as wind, solar and batteries, as well as on power system flexibility is also an important part of preparing the ...

Vietnam has dramatically increased its wind and solar targets as it looks to up its energy production by 2030 to meet soaring demand, according to a revised version of its ...
