If you're not going to use the battery pack for a while, store it at around 50% charge. Use the original casing or an insulated container to provide extra protection.

It ensures optimal battery utilization by controlling the battery's state of charge (SoC), state of health (SoH), and maintaining safety during charge and discharge cycles.

sive guide on lithium battery maintenance. Whether you're a consumer electronics enthusiast, a power tool user, or an electric vehicle owner, understanding the best practices
