Where can I view existing hydrogen fueling stations in California?

Existing and planned hydrogen fueling stations in the state of California are available to view on a map or download as a spreadsheet from the California Fuel Cell Partnership. The site includes station development and operational status. This material was prepared as an account of work sponsored by an agency of the United States Government.

How many hydrogen refueling stations are there in California?

The California Energy Commission (CEC) is committed to meeting the goal of 200 publicly available hydrogen refueling stations. The CEC has allocated \$20 million per year through the Clean Transportation Program (CTP) budget for these stations to support passenger, light-duty fuel cell electric vehicles (FCEVs)¹.

How do I find a number of hydrogen stations?

Roll over a state on the map for count of hydrogen stations. To map hydrogen stations near a specific address or city, use the Alternative Fueling Station Locator. For station counts and historical information, see Station Counts by State. Find maps and charts showing transportation data and trends related to alternative fuels and vehicles.

How many hydrogen fueling stations will open in 2025?

Expansion in these states has been driven by both public and private initiatives to encourage the adoption of hydrogen vehicles. Ahead of 2025, additional hydrogen fueling stations are expected to open in several regions of the United States. In California, the number of stations is planned to increase to 100 by the end of 2025.

Hydrogen refueling station counts are updated quarterly by the California Energy Commission staff administering the Clean Transportation Program funding for these stations.
