How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.

What are the requirements for a battery project in Vietnam?

The Vietnamese authorities also decided that battery projects under the FiT scheme must have at least 10% of a PV plant's capacity and offer at least 2 hours of storage. According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024.

The Solar Container Market was valued at 11.35 billion in 2025 and is projected to grow at a CAGR of 7.57% from 2026 to 2033, reaching an estimated 20.35 billion by 2033. ...

For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND ...

In Vietnam, the cost of residential and commercial solar battery storage systems is influenced by a variety of factors, including system capacity, battery chemistry, inverter ...

The combination of lower prices and better technology will likely lead to a robust market, positioning solar

batteries as a staple in Vietnam's energy landscape by 2025.

Each system, including 5 kW panels, a 10 kWh lithium battery bank, and real-time remote monitoring, cost around USD \$25,000, ...

As we partner with many reputable solar battery brands, you can have a business liaison with some of them and buy batteries in bulk quantities at wholesale price.

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost.

Each system, including 5 kW panels, a 10 kWh lithium battery bank, and real-time remote monitoring, cost around USD \$25,000, including shipping and installation.

In Vietnam, the cost of residential and commercial solar battery storage systems is influenced by a variety of factors, including system capacity, battery chemistry, inverter compatibility, ...
