-----  
How much does electrical grounding cost?

Electrical grounding gives excess current a safe route out of your home and into the ground, where it dissipates harmlessly. A grounding rod costs around \$100 to \$300. However, costs can quickly rise if more electrical work is needed to ground the property fully.

How much does it cost to add a ground wire?

The cost to add a ground wire to a house is \$100 to \$300. However, adding a ground wire from the main electrical panel to an exterior grounding rod does not ground the outlets throughout the house. Each outlet must have a ground wire running from the receptacle to the panel.

How much does it cost to ground an outlet?

Grounding an outlet costs between \$135 and \$300 per socket. This is a pretty simple job that requires switching out a two-pronged outlet for a grounded three-pronged outlet. Just installing a copper rod and connecting it to your electrical panel won't fully ground your house if there isn't grounding wire running through it.

How much does a grounding rod cost?

A grounding rod costs around \$100 to \$300. However, costs can quickly rise if more electrical work is needed to ground the property fully. While most modern homes come equipped with a grounding rod already in place, many older properties do not. Ungrounded systems are at an increased risk of electrocution and electrical fires.

The cost to add a ground wire to a house is \$100 to \$300. However, adding a ground wire from the main electrical panel to an exterior grounding rod does not ground the ...

Economically, improper grounding could lead to costly repairs and replace systems. For effective grounding,
