The project, located in Cotorro--on the outskirts of Havana--is part of the island's government's bet on solar energy to address the country's dire electricity situation.

Cuba has taken a significant step by inaugurating the first photovoltaic solar park of an ambitious national project designed to modernise its power grid. This development comes as the country ...

On Saturday, Cuba initiated the installation of solar energy storage batteries at four electrical substations, marking a significant step in addressing its energy challenges.

Cuba aims for solar energy growth, but lacks essential battery storage. Explore the challenges and solutions. Act now for change!

The plan anticipates one thousand megawatts of solar energy by 2025, but without installed batteries, which prevents meeting nighttime demand and limits the impact in the face ...

By the end of March, eight of the planned 50 solar parks will be operating, producing 170 megawatts, said Ovel Concepción Díaz, a top renewable energy official with the Energy Ministry.

Despite the scale of the program, only four parks are currently planned to include energy storage systems: two in Havana, one in Holguín, and one in Granma. Each of those ...
