What is a double glass module?

The double glass module design offers not only much higher reliability and longer durability but also significant Balance of System cost savings by eliminating the aluminum frame of conventional modules and frame-grounding requirements. The application of double-glass modules covers multiple markets including utility, residential and commercial.

Can a frameless PV module withstand snow and ice?

A frameless double-glass module and a traditional PV module with a 3.2mm glass with an aluminum frame were both qualified to withstand heavy accumulations of snow and ice under a high pressure of 5400Pa up to 6700Pa. modules are connected electrically in series until a maximum string voltage of 600 volt or 1,000 volt is achieved.

Are double-glass modules flammable?

Under exposure of a strong burning fire, double-glass modules present a high degree of resistance to ignition, do not propagate fire to the roof deck or other building material, do not slip from their mounting position, and are not expected to produce any flying burning debris. (Fig. 10,11)

Our dual glass modules use the same internal circuit connection as a traditional glass-backsheet module but feature heat-strengthened glass on both sides. We produce the back glass with a ...

This specialized glass, with iron oxide content below 0.015%, achieves light transmittance rates exceeding 91%--compared to 88-89% for conventional solar glass--directly enhancing ...

By choosing heat strengthened glass panels on both sides, we have been able to use a thickness of 2.5mm and to demonstrate an excellent module resistance to all standard mechanical tests ...

Residential Products List covers all household photovoltaic products, including inverters, energy storage, optimizers, controllers and other ...

Residential Products List covers all household photovoltaic products, including inverters, energy storage, optimizers, controllers and other household photovoltaic-related product series.

By increasing light absorption and reflection at the rear, double glass modules can generate more energy from the same surface area, providing superior economic benefits for your photovoltaic ...

Double-glass modules, with their performance in the face of salt mist, high temperatures and high humidity, have won the market's favour. However, this trend is not ...

This LED Flood Light is designed for architectural Facade, bridge and so on can deliver high efficiency light output and uniform beam with professional lens.

Double-glass module is not subject to potential induced degradation (PID) and boasts excellent durability, low permeability, long life cycle and other superior qualities.

The frame of each module has mounting holes compatible with M8 bolt, ideally placed to optimize the load handling capability, to secure the modules to supporting structure.
