Does Iran have a 5G mobile phone status quo?

Referring to the report of 5G mobile phones status quo in Iran, Irancell CEO stated that "the 5G project in Iran was initiated by Irancell as a pilot test in 1395 in a laboratory and finally in 1399, with the cooperation of ICT Research Center, the first commercial 5G site was launched in the country.

Will Irancell's 5G sites double by 2024?

In the National Conference on Iranian 5G Telecommunications, Irancell CEO declared that the number of the company's 5G sites will double by the end of 2024.

How many 5G sites are there?

Recently, concurrent with Irancell's 17th anniversary, we managed to increase the number of our 5G sites to 650 which is now close to 700 sites nationwide. There are about 6 million subscribers having mobile phones supporting 5G from whom 6000 subscribers have experienced this generation of communications.

Why is 5G traffic so low compared to the whole network?

Although, given the number of subscribers, there is relatively little traffic in 5G network compared with the whole network traffic, it is due to the fact that the 5G service is still locked in large percentage of mobile phones despite the increase in the number of 5G sites."

In the National Conference on Iranian 5G Telecommunications, Irancell CEO declared that the number of the ...
