---

Today's conference heard from a range of stakeholders across the renewable sector, discussing the potential role of energy storage in the Irish energy transition, and the ...

Lightsource BP has proposed a significant 57MW solar and 54MW battery energy storage project in Carrickmacross, County Monaghan, Ireland. The company plans to outline ...

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery ...

In conclusion, solar power is playing a vital role in Ireland's energy transition, with several major solar farms currently under construction or completed. The use of battery ...

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide ...

Wind and solar energy play a key role in Ireland's transition from fossil-fuel-based electricity generation. But these precious resources will need to be stored for times when the ...

Experts across the sector agreed that energy storage will be crucial for balancing the increasing share of renewable energy on the grid while maintaining the security of supply, ...

As Ireland's renewable energy landscape evolves, battery technology stands at the forefront of revolutionising how we power our homes. The next generation of energy storage ...

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a ...

As solar and battery storage technologies continue to evolve, they will play an even more crucial role in decarbonizing our energy system and achieving the country's renewable energy targets.

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key ...
