---

The proposed Ballynahone Energy Storage project, the first of its kind in Europe, is designed to use iron-air battery technology capable of discharging energy at its full power ...

This paper provides information on the characteristics of Grid-Scale Battery Energy Storage Systems and how safety is incorporated into their design, manufacture and operation.

SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) ...

Today's conference heard from a range of stakeholders across the renewable sector, discussing the potential role of energy storage in the Irish energy transition, and the ...

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air ...

Innovations in energy storage vehicle design are heavily dependent on the integration of smart technologies. The development of connected vehicles, which utilize ...

Working together with partners from Finland, Iceland, and Faroe Islands, the Irish wanted to find out how to best integrate a battery storage and smart energy management in ...

Using focus groups and a survey with the renewable energy and storage sector, we document perspectives on the critical barriers, innovative solutions and policy gaps identified ...

Working together with partners from Finland, Iceland, and Faroe Islands, the Irish wanted to find out how to best integrate a battery ...

Experts from across the energy industry emphasised the importance of energy storage to enhance grid flexibility, support ...

SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable ...

Experts from across the energy industry emphasised the importance of energy storage to enhance grid flexibility, support renewable integration, and promote industry ...

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air battery facility, a new technology that ...

While there are technical and geographical constraints for certain technologies, three technologies suitable for implementation in Ireland are battery storage in the short term, pumped storage ...
