Where is electricity produced in Montenegro?

The majority of electricity in Montenegro is primarily produced at the Pljevlja coal-fired Thermal Power Plant and the Perucica and Piva Hydropower Plants. The core activities of the majority state-owned Electrical Power Company of Montenegro (EPCG) are electricity generation, transmission, distribution, and supply.

How much solar power does Montenegro have?

Montenegro had installed solar power capacity of just 6 MW at the end of 2020. The country's solar power capacity is significantly smaller than the electrical power demand, which is currently met by the 225 MW Pljevlja thermal power plant in the north of Montenegro and two large hydropower plants, at Perucica (307 MW) and Piva (363 MW).

What type of power plug is used in Montenegro?

In Montenegro, the power plug sockets are of type F. Therefore, if you're coming from a country with different power plug types, you would need a power plug adapter.

How much is EPCG investing in battery energy storage systems?

The utility is procuring two grid-scale battery storage systems to the tune of EUR 48 million (\$55.9 million). EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand.

EPCG, the Electric Power Company of Montenegro, will launch a public tender for the procurement of 300MWh of battery energy ...

According to Milutin Djukanovic, the Chairman of the Board of Directors at Montenegrin state-owned power utility EPCG, the company is preparing to launch a tender for ...
