Designed to meet high operational standards and enhance resilience, the project resolves energy supply issues and reinforces grid stability for Islamabad's critical infrastructure.

Tendering will open this week for a 20MW battery energy storage system (BESS) pilot project in Pakistan that could help shape the creation of an ancillary services ...

As Pakistan accelerates its renewable energy transition, Islamabad's new hybrid energy storage initiative opens doors for global investors and engineering firms. Discover bidding timelines, ...

Experts pointed out that Pakistan's natural resources, including salt mines, make the country well-positioned for sodium-based battery production in the future. PGCEP Advisor ...

A textile factory in Islamabad reduced its diesel consumption by 68% after installing a custom 150kWh battery storage box paired with existing solar panels. The system paid for itself in 2.7 ...

While negatively impacting demand for grid electricity in the short term, the increasing use of battery storage solutions by rooftop solar ...

In a report published this week, the US-based think tank the Institute for Energy Economics and Financial Analysis (IEEFA), says that Pakistan's renewable boom has ...

While negatively impacting demand for grid electricity in the short term, the increasing use of battery storage solutions by rooftop solar consumers will likely improve grid ...

The convergence of rising energy prices and falling costs for Distributed Energy Resources (DER), such as
