This paper investigated integrating renewable energy, especially wind and solar sources, into the medium- and long-term plans at the Gjilan 5 substation to enhance energy quality in the area.

It seeks to rapidly scale up Kosovo's renewable energy capacity by leveraging solar, wind, hydropower, and biomass resources. This target is particularly significant because, as of the ...

The location, owned by government-controlled Kosovo Energy Corp. (KEK), is on the former ash dump of its Kosovo A power ...

In this direction, this policy brief aims to shed light on the challenges that customers in Kosovo encounter when trying to invest in solar energy.

Hydroelectric power generation is mainly provided by Ujmani power station with a capacity of 70 MW. In the past, Kosovo has had four functional hydroelectric power plants. After the 1999 war ...

The solar power plant, strategically located between the towns of Obiliq/Obilic and Fushë Kosova (Kosovo Polje in Serbian) near Prishtina, will be interconnected with the ...

The move aligns with Kosovo's broader strategy to diversify its energy sources and transition to renewables, as highlighted in resources like the Kosovo Solar Panel ...

The location, owned by government-controlled Kosovo Energy Corp. (KEK), is on the former ash dump of its Kosovo A power plant. The electricity producer is also getting a ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located

between Obilic and Fushe ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in ...

OverviewElectricity generationPolicy and regulationRenewable energy targetsTransmissionDistributionElectricity consumptionTariffsLignite exploitation in Kosovo started in 1922. New mines were opened to satisfy the needs by increasing generation capacities. Kosovo Energetic Corporation (KEK) is a public company, which owns and operates with generation assets of electric energy. The greatest part of generation capacities of Kosovo are the two power plants:

A photovoltaic system is being built on the areas where ash from the two coal-fired power plants at Kosovo A was previously deposited. It will have an installed capacity of up to 100 MW and ...

With a focus on sustainable development, Kosovo has been actively exploring wind and solar power as viable alternatives. The region's high altitude provides ideal ...

The move aligns with Kosovo's broader strategy to diversify its energy sources and transition to renewables, as highlighted in ...
