How much solar energy does Liberia have?

This high and consistent potential for solar energy across the country adds to an average level of 1,712 kWh/m<sup>2</sup>/year, which could generate 1,400 to 1,500 kWh/kWp. Some 43% of the land is covered with forests (41,790 square kilometers, World Bank 2015), thus there is no lack of trees in Liberia.

What is the cost of electricity in Liberia?

The tariff on generator usage in Liberia is estimated to be approximately US\$3.96/kWh, which is around 14 times higher than the LEC tariff, according to Options for Development of Liberia's Energy Sector. The document also mentions that the consumption of thermal energy in the form of charcoal and firewood costs Liberia about 960,000 trees per year.

What is Liberia's sustainable power?

Liberia's Sustainable Power. We harness the most valuable resource in rural areas -- tight-knit communities -- to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities -- opportunities to learn, communicate, start a business, and build a better life.

What is Lib solar doing?

LIB Solar is currently conducting a study to quantify the impact of our systems on household income and expenditures as well as carbon emissions. "Our team understands customers better than the competition and has the technology and financing to grow and succeed." Nicholai Lidow, CEO Stanford PhD with patents on solar cell technology.
