What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

What type of energy storage projects are recent contracts for?

Recent contracts are predominantly for much larger transmission-connected energy storage projects. Earlier energy storage contracts were significantly more expensive across all grid domains, and they generally reflect the cost reductions seen in the global storage industry.

Are high soft costs a barrier to energy storage deployment?

In 2018, the New York Public Service Commission (NY PSC) identified high soft costs as a major barrier for energy storage deployment in their state. The CPUC Energy Storage Procurement Study aims to address similar challenges in California.

What is the CPUC Energy Storage Procurement Study?

The CPUC Energy Storage Procurement Study aims to improve data practices by addressing the lack of comprehensive and quality-controlled actual project characteristics and operational data across all resources and grid domains.

Section 83E requires the Distribution Companies, in coordination with DOER, to solicit proposals from developers of Energy Storage Systems in a fair and non-discriminatory ...

As of October 2024, eleven states have established energy storage procurement mandates, targets, or goals, but only California and ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting ...

Procurement mechanisms play a crucial role in supporting long-duration energy storage (LDES) by providing financial security and ...

As of October 2024, eleven states have established energy storage procurement mandates, targets, or goals, but only California and New York include clear and distinct targets ...

Procurement mechanisms play a crucial role in supporting long-duration energy storage (LDES) by providing financial security and incentives that help overcome market ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

Incentive Program state of charge Dollars per kW (capacity) per month. Many benefits and costs in this report are expressed as this. metric due to its prevalence in resource adequacy ...

This energy storage technical specification template is intended to provide a common reference guideline for different stakeholders involved in the development or deployment of energy ...

What RD& D Pathways get us to the 2030 Long Duration Storage Shot? DOE, 2022 Grid Energy Storage Technology Cost and Performance Assessment, August 2022.

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges ...

You're at a renewable energy conference, and three people are arguing about battery cell suppliers. The engineer wants peak performance specs, the CFO keeps yelling ...

The goal of this attachment is to highlight effective energy storage procurement policies and programs in other states that might be helpful to the CPUC as it seeks to break down barriers ...
