Will Morocco develop a gas-fired power plant in 2025?

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.

Which power stations are in Morocco?

(December 2013) This article lists all power stations in Morocco. / 33.105225; -8.636734 (Jorf Lasfar Thermal Power Station) / 32.147652; -9.281060 (Safi Thermal Power Station) / 33.681114; -7.435791 (Mohammedia Thermal Power Station) / 36.0683; -2.1047 (Ain Beni Mathar Solar-Thermal Power Station) / 30.590; -40.00 (NOOR 1,2,3)

How much solar power does Morocco have?

Morocco has an average solar potential of five kilowatt hours (kWh) per square meter per day, although this varies geographically. Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power.

How can Morocco improve the security of the energy supply?

The Government of Morocco seeks to increase the security of the energy supply by reducing dependence on imports, including increasing the use of renewable sources for electricity production. As of the end of 2023, the share of renewable energy in the electrical capacity mix stood 11.42 GW (ANRE data).

List of power stations in Morocco This article lists all power stations in Morocco. [1]
