Muscat - Oman will soon announce its first renewable energy storage project as part of ongoing efforts to expand clean energy capacity and reduce dependence on ...

In March 2024, well-known Omani firm Nafath Renewable Energy signed an MoU with Takhzeen, a 100 per cent subsidiary of publicly traded firm ONEIC, to help introduce ...

Designed for policymakers, renewable energy developers, and tech-savvy environmentalists, this megaproject could become the Middle East's blueprint for grid resilience.

MUSCAT: A new solar PV based Independent Power Project (IPP), set to come up at Ibri in Al Dhahirah Governorate, is expected to be integrated with utility-scale battery ...

Efforts are already in place over there, particularly when it comes to power-to-hydrogen as large-scale energy storage for large hydroelectric power plants (e.g., Paraguay) ...

Continued pressure in the supply chain for storage components, including battery metals, has sustained increased prices and led to production and delivery delays.

Muscat - Oman will soon announce its first renewable energy storage project as part of ongoing efforts to expand clean energy capacity ...

With neighboring countries experiencing load shedding during peak summers, Oman's betting big on storage as geopolitical insurance. Their strategic reserve - equivalent to 45 days of ...

It is set to be the first energy storage project of its kind in the Middle East based on CO2 battery energy storage technology. A site has been identified for the establishment for ...

The city isn't just building solar farms--it's rewriting the playbook for how desert nations can leverage energy storage to avoid becoming toast (literally) in a warming world.

MUSCAT: A key study led by Omani scientists underscores the potential for the Sultanate of Oman to capitalise on the abundance of high-quality silica sand for cost-competitive thermal ...
