Can China unlock a new economic growth frontier in new-type energy storage?

Building on its leadership in electric vehicles, lithium batteries and solar panels, China is now poised to unlock a new economic growth frontier in new-type energy storage. The rapid expansion of clean energy capacity in China has presented the key challenge of green energy storage, which has prompted a surge of innovative solutions.

Which Chinese companies have a major energy storage contract?

Chinese companies such as Huawei, Envision Energy, CORNEX and Sunwoda have each secured major energy storage contracts in the Philippines, South Africa, Italy and Australia, respectively.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Is new-type energy storage a good investment?

New-type energy storage has been highlighted in many regional industrial plans, and its value target by 2025 has exceeded 3 trillion yuan (\$412.2 billion), said CNESA. Foreign investors are also eyeing the vast potential of the market.

Building on its leadership in electric vehicles, lithium batteries and solar panels, China is now poised to unlock a new economic growth frontier in new-type energy storage.
