The New York State Energy Research and Development Authority (NYSERDA) today announced over \$5 million is now available to support innovative energy storage ...

Both solar PV and energy storage targets are for the deployment of utility-scale and distributed projects. The board is currently ...

Many utilities have embraced gas, or promoted restarting closed coal or nuclear plants, but that overlooks the cheapest and fastest-to-build option - solar energy combined ...

Through the Clean Energy Program, DCAS works to expand distributed energy resources, including solar PV and energy storage installations across the City's portfolio of properties.

With a focus on utility-scale battery storage, utility-scale solar and community solar projects, our team specializes in front-of-the-meter power applications. Our mission is to enable a ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

When the sun doesn't shine and the wind doesn't blow, humanity still needs power. Researchers are designing new technologies, from reinvented batteries to compressed air and ...

When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once completed, the project will be amongst the largest ...

We must transition to clean energy solutions that drastically cut carbon emissions and provide a sustainable

New Energy solar Power Generation and Energy Storage

path forward. The synergy between solar PV energy and energy ...

Latest advancements in solar energy storage technologies in 2025 focus on enhancing battery technologies, system integration, and grid optimization, driving more ...

Both solar PV and energy storage targets are for the deployment of utility-scale and distributed projects. The board is currently seeking public input through written comments or at ...
