In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

From iron-air batteries to molten salt storage, a new wave of energy storage solutions is set to unlock resilience for tomorrow's grid.

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

After record growth in 2024, U.S. battery energy storage systems (BESS) could grow from more than 26 gigawatts (GW) of capacity--enough to power 20 million homes--to ...

As the U.S. transitions toward a cleaner energy future, these projects not only reflect advancements in energy storage technology but also demonstrate a commitment to ...

The project is expected to avoid 419 million pounds of GHGs annually, which is equivalent to removing 44,000 gas-powered cars from the road for one year or planting 3.1 ...

More than 80 battery peakers with power storage capacities of at least 100 MW are under construction, the largest of which is AES Corp.'s 700-MW Rexford 1 Battery Storage ...

Tesla continues to cement its position as a major force in grid-scale energy storage, with a new \$500 million battery energy storage system (BESS) set to come online in ...

Battery energy storage system (BESS) deployment in the United States is accelerating as rising power demand, including from data centres, drives the need for flexible capacity and grid support.
