How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarfold container?

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solarfold PV power plants.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why should you choose solarfold for your construction project?

Major construction sites require large volumes of electricity. Solarfold can produce clean and environmentally-sustainable electricity, particularly when immense volumes of energy are needed in inaccessible areas. When construction work is completed, the mobile Solar Container can be taken down and transported to the next project site.

Discover folding solar containers with solar panel integration, ideal for off-grid living. Features steel structure, 5-year warranty, and fast installation.
