---

Computer-generated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will ...

We offer high quality portabel energy with high skilled market knowhow & optimal logistic service. We are the exclusive distributor of Uniross in the Nordic region.

Diverse energy storage technologies are being developed and deployed across the Nordic countries. Lithium-ion batteries, flow ...

This initiative represents the deployment of 14 large-scale battery storage facilities with a total capacity of 211MW/211MWh - a historic investment and milestone in Sweden's ...

As the Nordic countries push forward with rapid electrification and record-breaking renewable energy development, a new structural necessity is emerging in the energy system: ...

The Norwegian company has deployed a battery energy storage system delivering 400 kW to fast-charging infrastructure using repurposed battery packs from electric Scania ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary ...

Diverse energy storage technologies are being developed and deployed across the Nordic countries. Lithium-ion batteries, flow batteries, and mechanical energy storage ...

“Think of supercapacitors as the sprinters of energy storage,” says Dr. Lena Fjellström, project lead at Nordic Energy Research. “They’re not here to replace marathon ...

It is designed to provide a flexible and scalable energy storage solution for a variety of industrial applications including providing backup power during outages, supplying power to remote or ...
